

January 25, 2012

To Whom It May Concern:

I am a board certified Family Medicine physician and the Chief Medical Officer at the University of Nevada, Las Vegas (UNLV) Student Health Center as well as an adjunct professor in the College of Osteopathic Medicine at Touro University Nevada. I supervise 3 physicians and 5 advanced nurse practitioners, as well as third and fourth year osteopathic medical students in their family practice rotations. I have been in practice for 16 years.

Since February of 2009, I have referred over 200 patients to the UNLV AquaStretch Wellness program, after AquaStretch relieved a personal back pain problem. My patients have consistently reported dramatic, immediate, and enduring pain relief from their AquaStretch sessions. That relief was experienced in a variety of medical conditions such as fibromyalgia, scoliosis, chronic back and neck pain including MRI confirmed disk problems, and from prior injuries. After receiving AquaStretch patients report significant decreases in the use of pain medication and sleep aids.

AquaStretch treated patients had less need for physical medicine services including chiropractic, physical therapy and OMT (osteopathic manipulative therapy). As a soft tissue preparation modality, AquaStretch has consistently allowed my OMT services to have greater and more enduring benefit. It has also allowed some patients to postpone, and in some cases eliminate, the need for expensive MRI and surgeries.

In conclusion, AquaStretch is a new evidence based wellness modality that will significantly lower health costs, improve patient health, and provide better health care.

Sincerely yours,

Salvatore J. Biazzo, D.O.
